...performed in a sample of 454 adult patients from the catchment population of eight family medicine teams at Dugave-Travno C clinic in Zagreb to assess their attitudes towards the family physician concept, its advantages and shortcomings. These family medicine teams providing care for 16,077 insures also the number of families care from these teams. **METHOD: The method of descriptive statistics was used.** Data were obtained on the number of families where only some members received care at the same physician's office and on the proportion of individual family members receiving care at family medicine offices. The sample indicated that more than half of patients received care from the same family physician,...

...taxation of land, unless the land is occupied for business activity, in which case it is always subject to real estate tax. In addition to land, property tax is imposed on buildings and structures. It applies to broadly defined categories of buildings. Normative definitions of these terms are contained **the Act on Local Taxes** the meaning of the Construction Law, which is permanently connected to the ground, separated from the space by means of building partitions, and has foundations and a roof. In a nutshell it may be stated that constructions which do not fulfil the characteristics of a building (e. g. squares, towers...
